

CASH ENHANCEMENT COMPOSITE OVERVIEW

As of March 31, 2025

KEY CHARACTERISTICS

Total Strategy AUM:*	\$2,601.7 MM
Strategy Inception:*	4/1/1986
Yield:	4.53%
Duration:	0.97 Years
Average Quality:	AA

PORTFOLIO MANAGERS

Peter S. Kaplan, CFA 1986 Industry: Merganser: 1986

Adam M. Ware, CFA Industry: 1996 2007 Merganser:

STRATEGY OVERVIEW

Investment Objective

- To exceed the returns of the ICE BAML 1 Year T-Bill Index over a market cycle
- Emphasize low volatility, high quality and portfolio liquidity

Investment Strategy

- Leverage our boutique size by investing in underappreciated areas of the market
- Employ extensive fundamental research and relative value analysis, with a goal of achieving attractive risk-adjusted returns while preserving liquidity
- Keep duration neutral to the benchmark; generate alpha through sector rotation and security selection decisions

Past performance is no guarantee of future results; investments can and may lose money. Investing in the bond market is subject to certain risks which impact performance including Interest-rate Risk, Market Risk, Inflation Risk, Reinvestment Risk, Business Risk, Liquidity Risk, Credit Risk, Extension & Prepayment Risk, Counterparty Risk and Regulatory Risk. Composite benchmarks are selected based on comparable duration and credit quality of US Dollar fixed income securities. Portfolios in the composites will invest in out of index securities which may result in positive or negative performance compared to the benchmark. All client accounts that met the composite criteria during the reporting period are included in the composite performance calculations. A description of composite eligibility is available upon request. Securities and characteristics can and will vary based on market conditions including liquidity, vield curve and ratings changes. yield curve and ratings changes.

Tables may not foot due to rounding.

^{*}Characteristic includes accounts that are not in the Composite. All other characteristics are derived only from accounts that are in the Composite.

^{**}Includes cash, receivables and payables.

Charts may not foot due to rounding.

Merganser Capital Management is an affiliate of Providence Equity Partners LLC. Gross performance returns do not reflect the deduction of investment advisory fees. Net performance is calculated and presented using the highest fee schedule for the strategy. Actual client returns will be reduced by the advisory fees and other expenses incurred in the management of the account. Merganser fees are available upon request and also may be found in Part II of its Form ADV. Actual fees will vary depending on, among other things, portfolio size and specific services performed for the client. The following example illustrates the effect of Merganser's fees on the value of a client portfolio. Assume a \$100 million portfolio earning an annual rate of 5% with an investment advisory fee of 0.18% per annum applied quarterly. Total portfolio value at the end of three years net of fees would be \$115,146,469 versus a total portfolio value gross of fees of \$115,762,500. Total returns reflect unrealized capital gains and losses and the reinvestment of interest, dividends and realized gains. Past performance is no guarantee of future results; investments can and may lose money. Composite benchmarks are selected based on comparable duration and credit quality of US Dollar fixed income securities. Portfolios in the composites may invest in out of index securities which may result in positive or negative performance compared to the benchmark. All client accounts that met the composite criteria during the reporting period are included in the composite performance calculations. Constituents as of non quarter end are preliminary. A description of composite eligibility is available upon request
